

The MEDAL Program has just announced the dates for their FREE hands-on career exploration series studying Medicine, Engineering, Dentistry, Architecture, & Law (MEDAL). You'll talk with current college students and professors about what it means to pursue a college degree, and get hands-on experience exploring each profession. A Parents' Workshop will bring parents and college officials together to talk about applying to and paying for college. The MEDAL Program is available to high school students who participate in free or reduced lunch programs.
